Professional Summary

Efficient software engineer, I am strong at implementing well-architected and high-performing software. I also enjoy to work with Cloud-based platforms such as AWS.

I like to work in a team with great working relationship and efficient communication. I am open to suggestions from any coworker.

Experience

Software Engineer

Sentient Investment Management, San Francisco, CA, September 2016 - now

Sentient Investment Management has been created out of the Trading Department of Sentient Technologies.

My work consists of the following:

- Implement strategies features in collaboration with the research team.
- Participate in analyzing results of experiments with the research team
- Improve the infrastructure of the experiments pipeline
- Maintain production environment
- Develop, improve and maintain a new data pipeline (replacing an old and heavy framework)

I am working remotely from Paris, France since April 2018.

Software Engineer Intern

Sentient Technologies, San Francisco, CA, February 2016 - September 2016

I worked as a trainee in the Trading Department of Sentient Technologies. The team I worked with focused on building automated strategies using Evolutionary Algorithms.

My internship consisted of the following:

- Developing web applications to monitor the research experiments
- Developing software to execute automated tests on research ideas
- Generating automated documentation of the experiments

Software Engineer Intern

Alvarum, Paris, France, September 2014 - January 2015

I participated to the development of the fundraising platform, working with Java/JEE, AngularJS, HTML/CSS/JavaScript, Groovy, Grails, Spring.

Teaching Assistant

EPITA, Paris, France, September 2013 - June 2014

Teaching OCaml and C# to freshmen.

- Development of practicals subjects.
 - Short lesson at every beginning of practical.
 - Marking exams
-

Education

Master Degree of Computer Science

EPITA • Le Kremlin-Bicetre, France • 2016

Skills

Java • AWS • Python • GCP • MySQL/PostgreSQL • Linux
